

HARISHMARAN SUBBAIAH THIRUMARAN

Business Analyst | Regulatory Change | AI-Enhanced Process Design

harishmaran2001@gmail.com | +31 6384147387 | linkedin.com/in/harishmaran | Orientation Year Visa – No sponsorship required | Amsterdam - NL

PROFESSIONAL SUMMARY

Business Analyst with 5+ years of experience in regulated, high-volume operational environments spanning UK public-sector compliance, client-facing service delivery, and a founder-led digital platform. Demonstrated ability to translate complex regulatory and policy requirements into structured operational procedures, control frameworks, and technology-aligned specifications. Experienced in stakeholder engagement across diverse cross-functional teams, requirements gathering, process redesign, and change facilitation. Familiar with AI concepts, including Natural Language Processing and Generative AI, with applied exposure to LLM-based tooling and automation in operational workflows. Agile delivery mindset with hands-on Jira experience and a consistent record of driving implementation from requirement through to post-launch validation.

WORK EXPERIENCE

Operational Analyst (Executive Officer) | Department for Work and Pensions (DWP)

Aug 2024 - Feb 2026

Cardiff, United Kingdom

- Supported large-scale, regulated operational workflows handling 2,000+ cases per month, operating within strict compliance, governance, and audit control frameworks - directly analogous to regulatory change adherence in a banking environment.
- Translated complex policy and regulatory requirements into clear operational procedures, SOPs, and control checkpoints, contributing to a 22% reduction in audit deviations and measurable compliance improvement.
- Acted as a cross-functional liaison between operations, IT, and policy teams, coordinating requirements, managing dependencies, and facilitating stakeholder alignment across diverse internal teams.
- Analysed end-to-end workflow data using SQL and Power BI to identify process gaps and root causes, contributing to a 19-25% improvement in case resolution timelines - delivering data-backed insights to senior stakeholders.
- Designed, built, and maintained KPI dashboards and management information reports used in senior operational reviews, improving reporting accuracy by 35% and supporting evidence-based decision-making.
- Contributed to continuous improvement initiatives by defining change specifications, tracking post-implementation metrics, and validating outcomes against agreed controls - applying an iterative, Agile-aligned delivery mindset.
- Coordinated exception and dependency resolution across multiple teams, improving turnaround for complex escalations by 28% through structured problem structuring and facilitated resolution processes.

Client Operations Analyst | The Contact Company

Jan 2024 - Aug 2024

Birkenhead, United Kingdom

- Gathered and translated business requirements from client stakeholders into CRM (Salesforce) workflow improvements, working directly with technology teams to shape and validate technical specifications - increasing first-contact resolution by 21%.
- Acted as a liaison between operations leadership, IT, and client stakeholders in a regulated, SLA-driven environment, influencing decisions and facilitating alignment across competing priorities.
- Led process mapping, documentation, and standardisation efforts, producing SOPs and operating guides adopted across multiple teams - reducing onboarding errors and process deviations by 95%.
- Analysed operational and performance data to design KPI dashboards and management reports, reducing diagnostic and reporting time for supervisors by 30%.
- Collaborated with technology teams to identify system issues, data inconsistencies, and integration gaps, defining problem statements and supporting resolution that improved data reliability across operations.
- Contributed to vendor and system change initiatives by validating outcomes against SLAs and KPIs, ensuring post-implementation performance met defined success criteria.

Business Analyst and Operations Lead | Cookooc (Digital Startup)

Jan 2020 - Dec 2023

Remote, India / United Kingdom

- Led end-to-end business analysis and operational design for a transaction-driven digital platform, gathering stakeholder requirements and converting them into workflow specifications, operating models, and technical briefs - handling 1,000+ monthly transactions.
- Owned the full implementation lifecycle for new operational processes and vendor integrations, from requirements scoping through deployment and post-launch review, reducing end-to-end cycle times by 27%.
- Applied emerging AI and automation concepts to reduce manual operational effort by 60%, including LLM-based tools for content generation, process documentation, and workflow optimisation - demonstrating practical familiarity with Generative AI in a business context.
- Coordinated with cross-functional teams (operations, technology, vendors) to manage integration dependencies, delivery timelines, and operational risks, acting as the primary bridge between business needs and technology solutions.

- Built operational dashboards, trackers, and governance documentation to improve visibility and execution discipline across the platform, supporting leadership decision-making through structured reporting and trend analysis.
- Drove adoption of new processes through change facilitation, documentation, training, and structured feedback loops - ensuring sustained implementation outcomes rather than one-time fixes.

SKILLS

Business Analysis: Requirements Gathering, Process Mapping, Gap Analysis, Solution Design, Change Facilitation, Stakeholder Alignment, Problem Structuring

Regulatory and Compliance: Policy-to-Process Translation, Compliance Controls, Audit Frameworks, Governance Documentation, Regulatory Change Implementation, SOPs

AI and Technology: Generative AI (LLMs, Prompt Engineering), Natural Language Processing concepts, AI-enhanced workflow design, Automation Tooling, Salesforce CRM

Data and Reporting: SQL, Power BI, Advanced Excel, KPI Reporting, Root Cause Analysis, Management Information

Delivery and Methodology: Agile delivery, Jira, Iterative implementation, Post-implementation validation, Cross-functional coordination, Vendor onboarding

Soft Skills: Stakeholder Influencing, Executive Communication, Cross-cultural Collaboration, Mentoring, Workshop Facilitation

PROJECTS AND KEY INITIATIVES

Regulatory Policy-to-Process Implementation | *DWP, 2024-2026*

- Led the translation of updated compliance and regulatory policy requirements into revised operational procedures and control checkpoints across a 2,000+ case/month regulated workflow, achieving a 22% reduction in audit deviations.
- Facilitated stakeholder workshops with policy, operations, and IT teams to validate requirements and define implementation specifications, demonstrating core regulatory change BA skills in a public-sector compliance context.

AI and Automation Applied to Operational Workflows | *Cookooc, 2022-2023*

- Researched and applied Generative AI tools (including LLM-based platforms and prompt engineering techniques) to automate process documentation, content generation, and operational reporting - reducing manual effort by 60%.
- Developed internal guidance on AI tool applicability and limitations for the founding team, advising on use cases, risks, and integration approaches - analogous to advising architecture and delivery teams on AI adoption in regulated change processes.

Vendor and System Change Delivery | *The Contact Company, 2024*

- Managed end-to-end requirements gathering and implementation validation for a Salesforce CRM workflow redesign, acting as the bridge between client stakeholders, operations leadership, and the technology team.
- Produced full documentation suite including business requirements, process maps, and post-implementation KPI validation - resulting in a 21% improvement in first-contact resolution and 14% reduction in average handling time.

Consulting-Style Business Analysis Challenge | *University of Liverpool, 2023*

- Led a 5-member team through a structured consulting engagement, applying problem structuring, stakeholder interviewing, and data-backed recommendation development to deliver an operational improvement proposal to external stakeholders.
- Recognised with HEAR accreditation for demonstrated leadership, analytical rigour, and professional communication skills directly aligned to senior BA responsibilities in a global banking environment.

EDUCATION

MSc International Business

University of Liverpool, United Kingdom | Grade: 2:1

Relevant: Global Corporate Strategy, Managerial Finance, International Management

Sep 2022 - Dec 2023

Bachelor of Engineering, Mechanical Engineering

Kumaraguru College of Technology, Anna University, India | Grade: 8.1/10

Aug 2018 - Jun 2022

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Google Project Management Certificate, Coursera (2024)
- Generative AI for Business Professionals, LinkedIn Learning (2024)
- Microsoft Power BI Data Analyst (PL-300), in progress
- Agile Project Management Fundamentals, Coursera (completed)
- HEAR Accreditation, University of Liverpool - Leadership, Problem-Solving and Professional Communication (2023)
